

SCR Power Controller

Description:

We take pride in introducing ourselves as one of the renowned suppliers of SCR Power Controller that are fabricated using high grade raw material. These are engineered following well defined industrial procedures and are appreciated for their robust construction and excellent finish standards. They are available at competitive prices.

Technical Specifications:

- Single pole, Normally open switching device for control of resistive heating loads
- zero voltage or phase angle fired
- Extends Heater life-eliminates thermal shocks
- Convection cooled
- Supply voltage-120/240/440.Vac, 50-60 Hz, single, two or three phase for star/delta connected resistive load up to 15Amps to 200Amps
- I2T fuse protection options
- Soft start, voltage limit and manual pot available
